## About ArcelorMittal Tailored Blanks Detroit: 2019 data

Located in the I-94 Industrial Park on the city's east side, ArcelorMittal Tailored Blanks Detroit is housed in the historic building which previously served as the headquarters of Michigan company R.C. Mahon. Uniquely well-positioned to supply automotive customers in the region, this facility is a part of ArcelorMittal Tailored Blanks, the company's specialized business unit for tailored blanks, or laser-welded blanks — a manufacturing technology that improves the performance of car parts in a vehicle. ArcelorMittal Tailored Blanks Detroit produces laser-welded blanks that are stamped and assembled into the following components: structural rails, door rings, door pillars, door inner (front and rear), cowl sides and structural body-sides.

### Facility facts

Plant manager	James Brown
Employees	138
Building space	313,000 sq ft
Site founded	2016
Products	Laser-welded blanks
Markets served	Automotive, automotive stamping
Services provided	Laser welding and ablation
Principal production facilities	Six weld cells, six ablation cells

## About ArcelorMittal

ArcelorMittal is the world's largest steel and mining company. In 2019, ArcelorMittal globally had sales of \$70.6 billion, steel shipments of 83.9 million net tons and crude steel production of 92.5 million net tons. ArcelorMittal employs nearly 191,000 people and has an industrial footprint in 19 countries on four continents.

In North America, ArcelorMittal Tailored Blanks, a subsidiary of ArcelorMittal, employed 450 individuals across seven facilities in 2019, and serves the automotive industry exclusively, supplying laser-welded blanks for door rings, door inner, pillars, rails, crossmembers and sills as well as other applications. With 24 weld cells, 9 ablation cells and 3 blanking lines, ArcelorMittal Tailored Blanks Americas' manufacturing technology helps customers establish an optimized solution for the cost, weight and performance of structural car parts.

With a significant presence in the communities where we operate, we strive to understand and address the needs and issues of our local communities and actively engage with all stakeholders in order to contribute to a more sustainable future. We are proud to now extend this commitment in the City of Detroit.
