

ArcelorMittal

Environmental Policy USA

ArcelorMittal USA is the leading steel company in North America with a commitment to produce safe, sustainable steel. We are dedicated to the responsible management of our enterprise in a way that minimizes environmental impact.

We believe that being a leader in environmental management will strengthen our business performance and support a sustainable future for our stakeholders.

We will drive our actions with this framework to support our policy:

- Implement and maintain **environmental management systems** that support the achievement of this policy;
- **Comply** with all relevant legislation, regulations and other requirements;
- Minimize our environmental impact, including our **CO₂ footprint** where technologically and economically feasible, through **continual improvement** of our equipment and process management capabilities;
- Utilize our resources efficiently: **Prevent pollution** by minimizing emissions and waste generation, and through the efficient use of **natural resources, energy and land**;
- Establish and maintain practices, including audits and the setting of **environmental objectives**, to ensure adherence to this policy;
- **Improve employee awareness** of their individual roles and responsibilities with respect to achieving our environmental goals;
- **Improve supplier and contractor awareness** and adherence to ArcelorMittal USA's environmental policy;
- **Facilitate open communication** with stakeholders affected by ArcelorMittal USA's operations, whether they are employees, customers, suppliers, shareholders or community members.

The guiding principles of ArcelorMittal USA's Environmental Policy are to:

PROTECT AND IMPROVE THE ENVIRONMENT
